

Editor's Review:

Little Hands To Heaven

I have just discovered the sweetest curriculum for 2-5 years old? You will have so much fun using this wonderful book to teach your children through the Bible using the book's great method which includes: studying one Bible story a week by Reading or telling the Bible story, Finger play, Alphabet activity, Bible activity, Music activity, Art Activity, Active Exploration, Devotional Activity, Dramatic Play and a Math activity.

The book provides all the fingerplay activities and all the ABC and Number print outs you will need. They make some suggestions for additional books you will also want to utilize.

Some of the Bible stories that this book covers are: Creation and the Fall, Earth and the Flood, Joseph, Moses, God's Laws, Joshua, Judges, David, Solomon, Jonah, Jesus (several about His life and ministry) and Paul.

You will find this so easy to work with and your little ones will look forward to School time knowing it will be fun to learn.

HomeSchool Tip:

One of the best things I ever did was buy a bunch of small items at a garage sale or the dollar store that I knew my kids would like. I set this up like a store. Everytime they got a perfect score on a paper, they earned coupons to use in our “store”.

At the end of the week they got to redeem their tickets. I made some items larger that they could save up for. You can also ad movie tickets or special field trips to the store.
